

### END OF FINANCIAL YEAR SPECIAL

Just FIVE weeks until the end of the financial year; why not spend that budget on updating your old hardware.

Did you know that Small Business changes announced in the 2015-16 Budget are now law and that if you have a \$10 million small business turnover threshold (previously \$2 million), you can access a range of small business concessions, including the **\$20,000 instant asset write-off**.

So for the month of June, Compunets has secured some special pricing on PC's.

Place your order as soon as possible and we will deliver your PC and invoice you before June 30, 2017.

Orders will be placed and delivered on a first come first served basis. So order 1 or order 10 it doesn't matter.

#### The PC's are our standard spec:

- INTEL CORE i5 6400 2.7 S1151,
- Genuine GIGABYTE H110M-S2HS1151 2DDR4,
- 8 GB DDR4 -2133 DIMM,
- Inwin BL647 mATX low profile Black 300W,
- High Speed 250Gb SSD,
- LG SATA DVD-RW Black,
- VC Intel on board with dual monitor support

PC's will be setup ready to go with Windows 10 or 7 preloaded. Email and business software will need to be loaded and we can assist with this at our standard rates. (Keyboard, Mouse & Monitor not included)

If Laptops or Notebooks are your preference give us a call on 8363 0371 to discuss your requirements and specification.

### BACKUPS & VIRUSES

You would have all heard about the issues with backups and viruses lately.

End Point (Workstations) Protection is an area often overlooked. The Virus, recently aired on TV and Radio in the UK, was targeted at IT environments using Windows XP and 2003 operating systems.

If unsure of your IT environment, Compunets can do a quick audit of your system and determine which PC's have what and what is required to update your protection.

Do not underestimate the need for backups. Whilst not adding value to your business now, it's when things go wrong that you will be wondering where all your data has gone. It is not a case of "IF" but "WHEN".

Disaster recovery, trying to find where your data is and getting it back onto your system is a costly exercise – far more than the annual cost of regular daily backups.

Are you at risk or simply just don't know where to start with backups – give us a call and let's start the discussion about Managed Online Backups or other suitable solutions.

### NETWORK HEALTH CHECK

Compunets is offering all Clients a

#### FREE NETWORK HEALTH CHECK

The report generated will provide us with information that shows which area of your network needs immediate attention to keep your business running smoothly.
